

K-LOVE serves me as a resident of the local community by providing the type of music that I like without commercials. It provides me with local, national and world news without bias. It provides community bulletins and news of concerts in the area of the artist I enjoy listening to. If this channel were to be displaced by an LPFM I would feel displaced from being able to listen to a great positive and encouraging station that has long been a source of power and hope in my life. K-LOVE provides a service that is in the public interest because I am part of the public and it interests me.
